Noticias de la Comunidad Portuaria del Puerto de Gijón

SEPTIEMBRE 2009

El Musel aumenta su oferta en contenedores con un servicio con el Reino Unido y conexiones con África Oriental

El Puerto de Gijón cuenta con un nuevo servicio de contenedores, desde que el pasado 11 de mayo la naviera WBC Lines iniciara una nueva línea que conecta el Puerto de Gijón con el Reino Unido y los Países Bajos.

La naviera WBC Lines opera el servicio con el buque WBC Vermeer, de 925 TEUs de capacidad. Además, la nueva línea ofrece excelentes tiempos de tránsito para otros destinos, mediante trasbordo en los puertos de Felixstowe o Rotterdam, como: Alemania, Bélgica, Caribe, Escandinavia, Báltico y Rusia.

En la actualidad, las líneas que operan en el Puerto de Gijón, de tipo *feeder*, en régimen de conexión *carríer*, permiten que las principales navieras del mundo ofrezcan en su cotización el Puerto de El Musel.

La naviera WBC Lines ha iniciado, asimismo, una nueva conexión que permite mover de forma regular de contenedores entre el Puerto de Gijón y África Oriental.

Las actuales líneas de WBC permiten a los armadores de Asturias viajar hasta

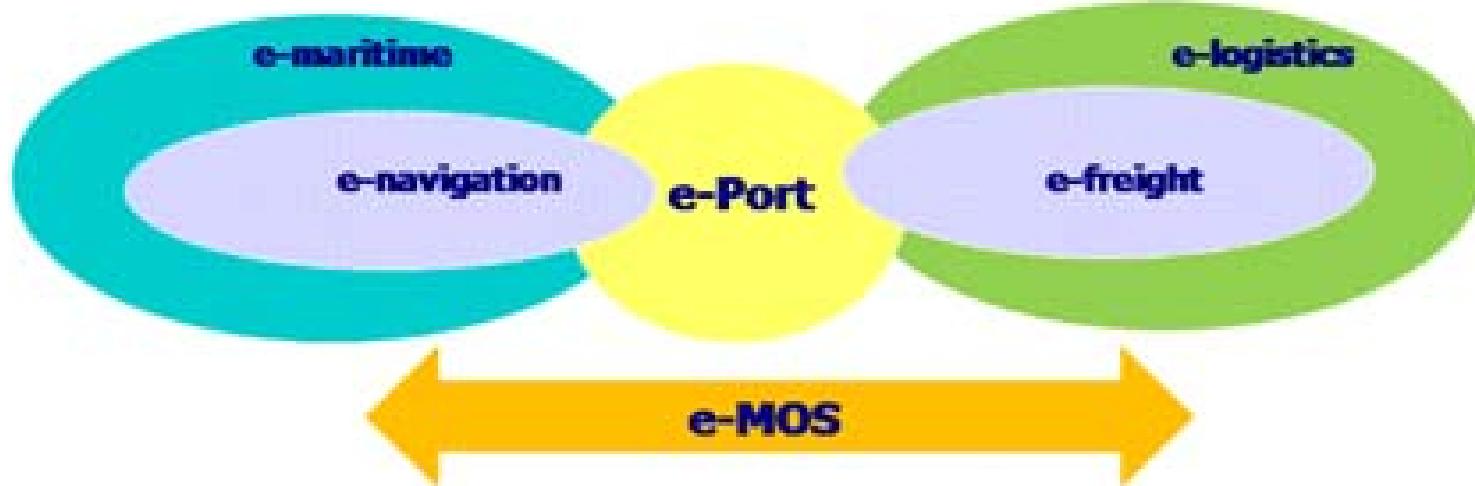

Destinos ofrecidos

La línea ofrece los siguientes destinos:
DURCHUTI – Dibraai

REPÚBLICA DEL CONGO - Bakwanga

Goma/Lubumbashi (vía Dars es Salaam)

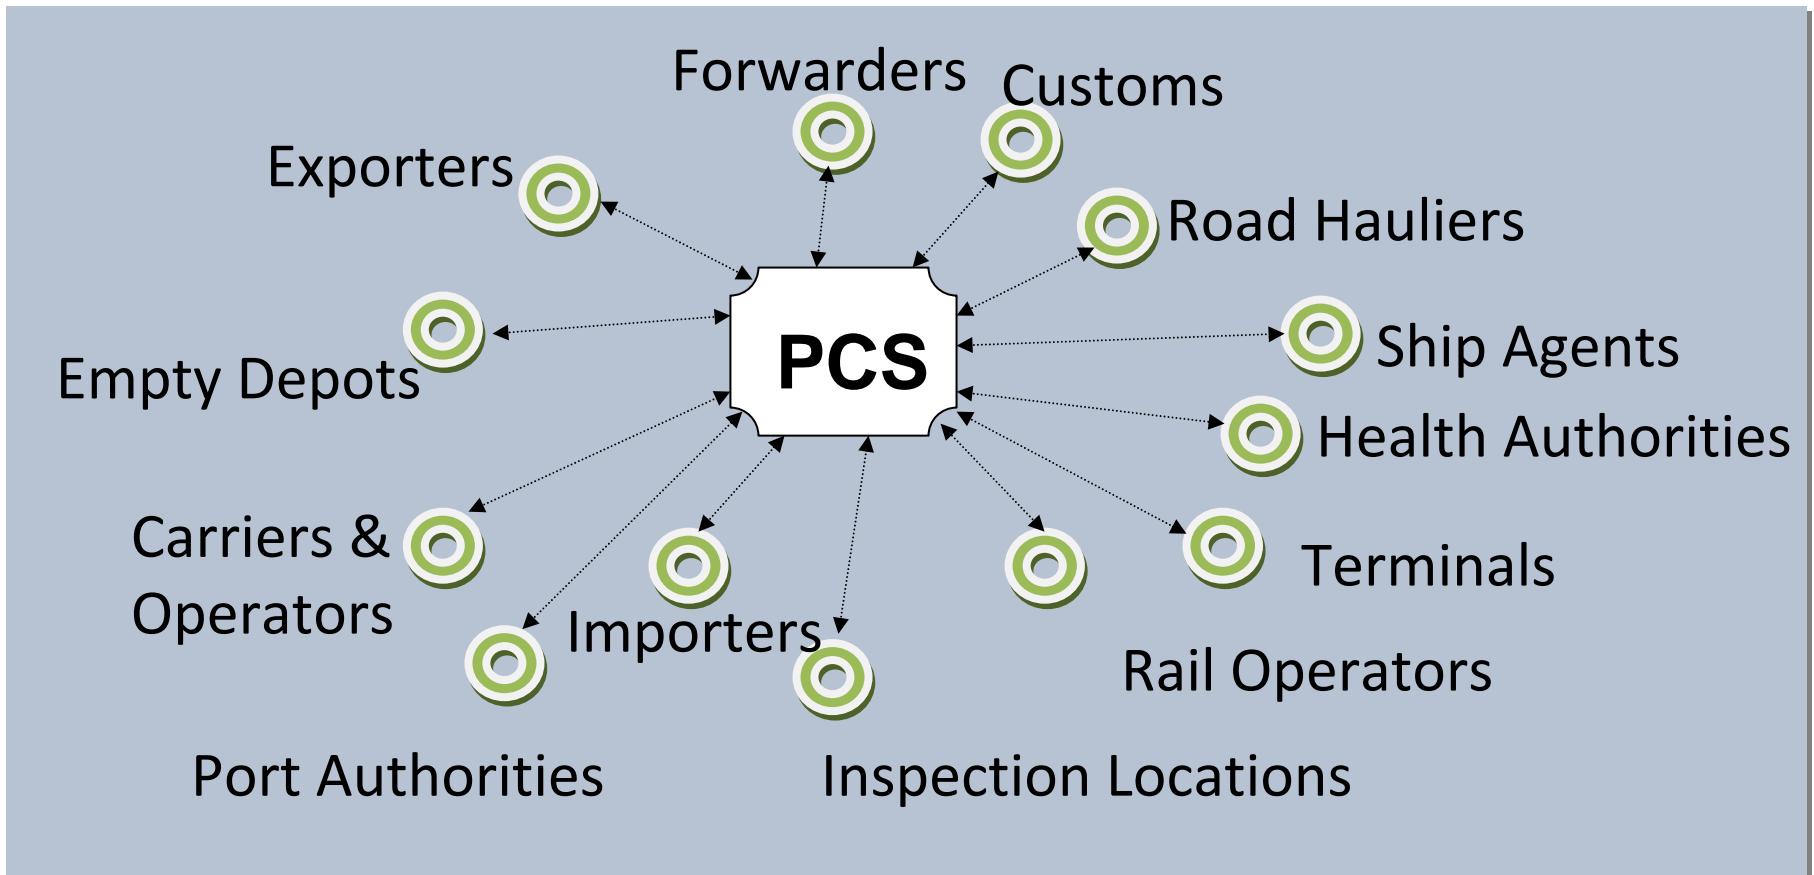

REPÚBLICA FEDERATIVA DE VENEZUELA - Puerto Cabello

concept	definition
e-logistic	Manufacturing , transport and delivery integrated cargo logistics
e-freight	Land transport ICT services
e-maritime	ICT & Satellite technologies sea & ocean management
e-navigation	Maritime & IWW transport ICT services
e-MOS	Co-modal transport services giving D2D services
e-Port	Port management based on PCS & PSW services

Port Community System provides easy exchanges of information between logistic chains crossing through the Port.

PCS has a B2B character (Business to Business)

PSW has B2G character (Business to Government)

STRUCTURE AND SERVICES

- Pre-arrival notification on the arrival of a ship given 24 h before the arrival.
- Pre-arrival security notification given by the ship before arrival (ISPS code).
- IMO general declaration regarding the arrival of a ship into port (IMO/FAL Form 1)
- Fairway tax notice as a consequence of the port call.
- Cargo declaration notice for arriving or departing cargo attached to the port call, presenting the goods.
- Dangerous goods notification (IMO/FAL Form 7).
- Cargo information for official maritime traffic statistics.
- Dangerous goods notification to the port, enabling the port to issue an official dangerous goods reception permission into that particular port.
- Waste notification regarding ship generated waste.
- PortNet issues a Customs reference ID code to be carried throughout the port call.

A *SINGLE WINDOW* will cover important functions to increase the competitiveness in Maritime Sector:

- Simplify administration procedures.
- Improving the use maritime transport.
- Support efficiency of Shipping services. Real costs per ton/Km.
- Create a real network in the European ports.
- Develop competitive technology suppliers.

CUSTOMER SERVICE DESK

PORT COMMUNITY has been working to be the properly connection between Client and Service Provider or Public Entity through the CUSTOMER SERVICE DESK. His used is voluntary, but it is good thermometer to measure the customers perception.
