ECS – Member States of Exit

ECS Summary

- In September, the number of movements released per week increased compared to August (~260,000);
- Error rate decreased in September (0.38%) compared to August (0.45%);
- Major issues:
 - Declarations from FR rejected by several NAs, due to violations of reporting protocols;
 - Several cancellations and diversions are rejected due to different reasons (cross-booking, old movements, out of sequence);
- The global availability of the ECS was 99.5% in July, above the target and the limit.

Modernised Customs Code/ Union Customs Code

Commission proposal on UCC – COM(2012)64

Reasons behind:

- Implementation of a major part of the processes depends on a wide range of electronic systems which cannot be developed within the deadline fixed in the MCC

- Alignment with the new provisions of the Lisbon Treaty

- Adjustment of some provisions of the MCC that have revealed (e.g. regarding the temporary storage of goods) difficult to implement through sound measures and workable business processes.

Discussion launched at Council and European Parliament

Target date for approval (1st Q 2013)

Any Questions??
