RESPONDING ASSOCIATION:	

RESPONDING ASSOCIATION COMMENTS: (Please include any attachments)

I listed some masters and PhDs in transportation (or related topics) available in Italy. Please note that this list cannot be considered complete. In all probability, there are other masters not mentioned here. In Italy, generally, all masters are subject to fees. In many cases, a limited number of scholarships is provided. For those listed here, only TrainMoSII is free of cost.

Regarding PhD, in Italy when a candidate applies for it, he/she has to submit a project. This can be on a wide range of topics, and therefore it is not possible, generally speaking, to define where PhDs in transportation are. I named some of them.

Moreover, I am sorry but not all the websites are available in English.

Master:

University Bocconi, Milan:

Master in economia e management dei trasporti e della logistica e delle infrastrutture

Contact-person

University of Genoa, Genoa:

1) Master assicurazioni marittime
